

The Everwarm

Real Wood Log Set Setup Instruction

STEP 1: Unpack the box

Carefully remove all components from the packaging and lay them out on a clean surface.

Make sure everything is included and undamaged.

- Included in Seren box: Slate Stones / Black Crystals / Red Ember Crystals / Ceramic Logs (these will not be required as the Real Wood Logs will replace).
- Included in The Everwarm box: Real Wood Logs / Decorative Bark / Oak Chippings / Natural Lichen

STEP 2: Add the Slate Stones and Black Crystals

Begin by layering the Slate Stones and Black Crystals across the base of the firebed.

This adds texture and depth to the firebed for a more natural look.

STEP 3: Spread the Red Ember Crystals

Next, evenly spread the Red Ember Crystals around the Slate Stones and Black Crystals.

These will help mimic the glowing effect of real embers.

STEP 4: Layer the Wood Chippings

Sprinkle the Wood Chippings around the base, filling in gaps and enhancing the appearance of a natural fire setting.

STEP 5: Position the Real Wood Logs

Arrange the Real Wood Logs on top of the Chippings. Stack them thoughtfully to resemble a naturally placed log pile - aim for a mix of horizontal and angled positions.

STEP 6: Insert Bark Pieces between Logs

Tuck small pieces of Bark into the gaps between the Logs.

This adds authenticity and helps blend the setup together visually.

STEP 7: Finish with Decorative Lichen

Finally, place the Decorative Lichen in small clusters around the Logs and Bark.

Use sparingly for a subtle, realistic touch of woodland detail.

Each set contains Real Wood Logs, which naturally vary in appearance and may differ from the image shown.
